

## #5G

Alpha Wireless' 3.5 GHz product range covers all types of applications from standard macro coverage to small cell for densification in urban environments. Our solution set includes innovations in beamforming to enhance performance and all-in-one small cells to provide concealment and speed of installation.

## Erlang Touts Alpha Wireless Solutions

Alpha Wireless' antenna solutions have been endorsed by Erlang in a report looking at ways to improve mobile cell sites. "The visual impact of cell sites is a constant concern for multiplicities and network operators, so concealment is a key focus," Fergal Lawlor", CEO says.
